GRANDSTREAM ANNOUNCES NEW FXO ANALOG GATEWAY

Boston Convention & Exposition Center – Boston, MA.

Grandstream Networks, a leading designer and manufacturer of next-generation IP Voice and Video products for broadband networks, today announced the release of a new analog IP Gateway that features 4 or 8 FXO ports, dual 10M/100M network ports, and a video port that offers video surveillance capability.

The GXW410x series offers the small enterprise, SOHO, remote offices and multi-location enterprises a cost-effective IP solution to help better manage communication costs, increase the feature functionality of their phone systems and create a seamless office environment. Designed and tested for full interoperability with leading IP-PBXs, Softswitches and most SIP-based environments, the GXW410x technology ensures superb voice and video quality, easy manageability, and rich features at very competitive price. It supports up to 3 SIP account profiles, 1 or 2-stage dialing, caller ID, T.38 fax, programmable PSTN line settings for various different countries/regions, G.711 (a/u-law), G.723.1, G.729A/B, G.726, GSM, and in the future iLBC (pending) voice codecs, and H.264 video codec (up to 30fps and CIF resolution) for the video surveillance port.

“The GXW410x series addresses the growing desire to leverage the benefits of IP telephony in an easy and cost-effective manner. The Grandstream analog gateway allows any business to seamlessly connect multiple locations with up to 8 PSTN lines, to an IP PBX system, or with an existing traditional phone system. The GXW series’ exceptional voice and video quality, ease of use and affordability really sets the product ahead of the competition,” said David Li, CEO of Grandstream. “This product release reinforces our commitment to developing next-generation and affordable IP voice and video products for both small business market and the enterprise. We will continue our commitment to deliver the most innovative and affordable IP multi-media products for our customers.”

The GXW410x product series will be available through Grandstream’s distribution channels worldwide by the end of September, 2006. For more information about the GXW410x FXO Analog Gateway Product Series, please visit our Website at: www.grandstream.com.
