

Cam Viewer Professional

The PLANET Center Management Software, Cam Viewer Pro, is a multi-camera video surveillance application. It helps to easily create surveillance systems for large area coverage using multiple cameras and controlled from a single PC to protect your property and life. Cam Viewer not only supports PLANET IP surveillance products but also supports IP surveillance products from other vendors. Packed with many advanced features, it allows you to deploy and integrate multi-brand IP surveillance products.

Cam Viewer Pro can monitor and record images / videos from multiple cameras simultaneously using a single PC up to 64 channels. Each camera has its own settings for recording, event, trigger, codec, resolution and quality. You have full control and flexibility to customize your IP surveillance products and system from a single workstation.

All the videos in the recording system are sorted by time. It supports cycle recording to rewrite the oldest video in the system and to make the recording system work more efficiently. The recording video can be saved in the PC hard disk or network storage, such as NAS and FTP. It also supports cutting function that users can set the start and end time point to export the video without additional editing software.

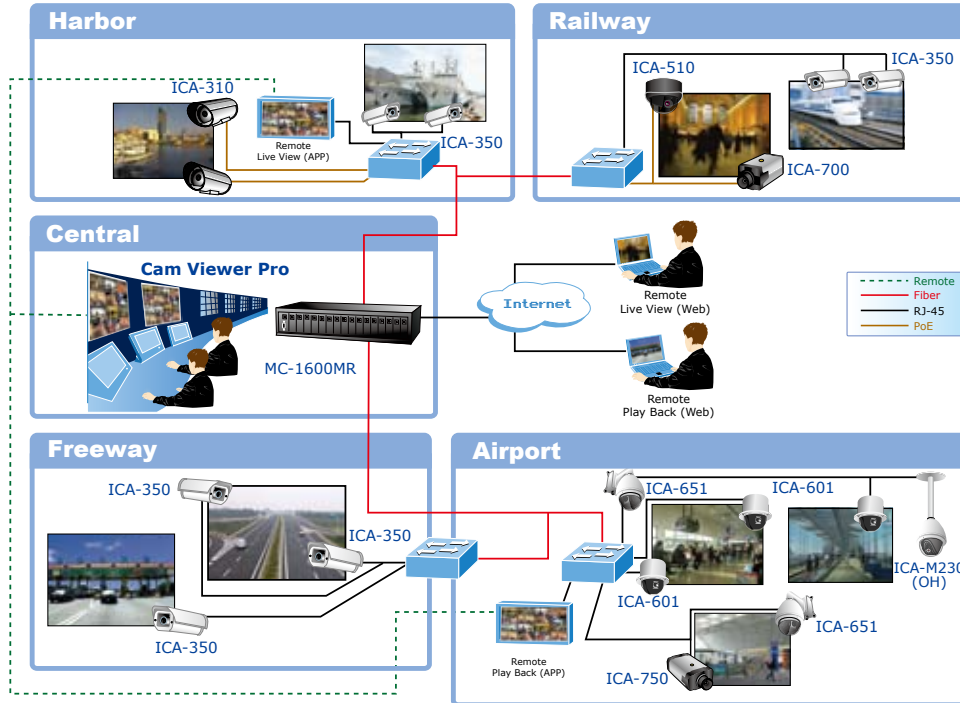

Embedded smart guard system in the Cam Viewer Pro helps to handle unusual events and instant notification actions. It supports the intelligent system to detect 6 different events and 6 different reactions which can be will trigger, which helps the administrator to manage the surveillance system easily. The enhanced playback system enables to search the files by event or notification actions. Multi-channel playback is available as well for users to playback several channels at once and thus save the searching time. The users may also make a video clips as evidences during the playback.

KEY FEATURES

- Multiple cameras support up to 4 / 8 / 16 / 25 / 32 / 64 cameras
- Supports multi-language
- Dual monitor support for viewing live video and playback simultaneously
- Watch the live video from multiple remote Cam Viewer servers
- Up to 16 channels multi-view playback simultaneously
- Supports remote viewing and playback by built-in web server
- Backup in hard disk, CD and network storage
- Most ultimate flexibility record by schedule
- Adjusts resolution, fps and quality for each camera
- Smart detector for 6 different events
- Object counting application
